To Whom It May Concern,

I am privileged to write this letter of recommendation for Hamza Qureshi, who was a valued contributor to our security compliance team here at FedHIVE. Hamza successfully prepared for and assisted in various comprehensive security framework assessments, including FedRAMP (NIST 800-53), Cybersecurity Maturity Model Certification (CMMC), Department of Defense (DoD) Impact Level 4 (IL4), and Impact Level 5 (IL5).

Working within these high-impact environments required not only knowledge of each of the security frameworks but also the small nuances between them and the ability to operate with situational awareness to ensure that all control families - including Access Control, Configuration Management, System and Communications Protection, and Audit and Accountability - was thoroughly evaluated according to mission-critical confidentiality, integrity, and availability standards.

As a cybersecurity analyst, he worked with system administrators to gain an understanding of various virtual environmental deployments, and the security parameters aligned based on those deployments with various security control requirements spread across multiple security frameworks. He has demonstrated the ability to simplify complex solutions down to pointed implementation statements pertaining to a broad array of security control families and developed a formalized template to create a repeatable process for all customer deployments our organization supports.

Thanks to Hamza's efforts, our organization has grown its security compliance footprint significantly, which in turn has created additional opportunities to assist our customers by delivering secure cloud-based solutions. I can confidently recommend Hamza Qureshi's application to your program and am confident he will leverage his valuable experience and technical expertise to your organization. Please feel free to contact me directly using the contact information above if I can provide any additional insight.

Sincerely,

Robert Wilkinson
